

Our Readers Write to Us (and we respond)

21 July 20902

[PE was] featured in the Saturday Telegraph Magazine Bookmarks Column 10 days ago. I found enough of interest to read half-way through the night. Seriously addictive. As I am an interested layman in the field, I don't think I'd have anything to contribute, but will be interested in reading any discussions. Brilliant!

PE is a great service to the paleontological community. It provides an effective and innovative format for articles, especially for graphics and animation. Plus, the papers can be printed from PDF files, which I like to do for later re-reading. The editorials, bookreviews, and announcements usually go beyond what one would find in a regular print journal. Many thanks to all the staff for your work on PE.

Peter P. McLaughlin, [Jr](#)
