

APPENDIX 2. Postcranial anatomical measurements of *Paludidraco multidentatus* (MUPA-ATZ0101) and *Simosaurus gaillardotii*

Table S1. Selected measurements (in mm) of the vertebral elements for the holotype of *Paludidraco multidentatus* (MUPA-ATZ0101) and for the specimen SMNS 14733 of *Simosaurus gaillardotii* in the present study. **Abbreviations:** -, missing, not observable or not applicable; *, estimated measurement; **, distorted measurement due to bone deformation; cH, centrum height; cW, centrum width; tpH, transverse process height; tpW, transverse process width; tpD, distance across transverse processes; nsH, neural spine height; nsW, neural spine width; nsL, neural spine length; prD, distance across prezygapophyses; ptD, distance across postzygapophyses.
